The Description of Risk-Taking Behavior In Young Girl Who Become Sex
Workers; (Henny E. Wirawan, M.Hum., Psi., QIA); Psychology Program of
Study S-1, Tarumanagara University (117 pages, P1-P5, L1-L16)**

This research conducted to know the description of risk-taking behavior in young girl who become sex workers, who have either dropped out of school or still in scholl. This study involved four subjects. The data process was done in teh time period between August 2008 until April 2009. Risk-taking behavior that been experienced by the four subjects is based on the condition from their relationship with their parents, siblings, peer groups, and their friend of the opposite sex gender (opposite type). Based on results of the research, it was known that to this four subjects including in the individual that had risk-taking behavior before they were involved in their prostitution activity, they were realising and knowing the risk that will be dealt with by them, but they still continued to decide to become sex workers.
