Achievement motivation in badminton athlete from adolescent. (Henny E. Wirawan M. Hum., Psi, QIA); Psychology Study Programme, Undergraduate Programme, Tarumanagara University. (i-vi, 1-100, P1-P3, L1-L6)

Badminton is a popular sport in Indonesia which it bring Indonesian to international world. In badminton, training is requited since their childhood. So then, when they reach adolescent and have achievement, they can be trained to follow what their seniors have contributed to the country. There is so much factors from psychology who influence achievement, one of them is motivation to achieve. That is why this research want to see achievement motivation in badminton athlete who are adolescent. Subject in this research is three boys and girls, whose age 16 until 20 years old. This research began from 20 December 2009 until 14 April 2010. In this research found that all subjects prefer badminton because they see that their achievement in badminton is better than their school. They also said that in a game the most important thing is to play with the best possible, although still have a target to become the champion. All subjects in this research also possess the characteristic of excellent athletes. In addition, the factors affecting their achievement is that parents, coaches, technical factors, physical and mental.

Key Words: achievement motivation, badminton, adolescent athlete
