

ABSTRACT

Charlie

The correlation between self-esteem and prejudice toward opposite sex in early adulthood woman (Sandy Kartasamita, M. Psi.); Bachelor degree of psychology, Tarumanagara University, pages,

The purpose of this research is to find the correlation between self-esteem and prejudice toward opposite sex in early adulthood woman. This research hypothesis says that there is a negative correlation between self-esteem and prejudice toward opposite sex in early adulthood woman. This research sample is woman at age between 20 to 25 that reside in Jakarta. The hypothesis is analysed using Spearman correlation yields $r_s(300) = -0,198$ and $p/\text{sig} = 0,001$, $p < 0,01$. It mean, there is a negative correlation between self-esteem and prejudice toward opposite sex in early adulthood woman. The conclusion is, the higher the self-esteem in early adulthood woman, the lower their prejudice toward opposite sex

Keywords : self-esteem, prejudice, early adulthood
