

ABSTRACT

WINDA WAHYUNINGTYAS (705040034)

The Correlation between Achievement Motivation and Learning Achievement of English (P Tommy Y. S. Suyasa, M.Si., Psi. & Sandi Kartasasmita, M.Psi); Faculty of Psychology, Undergraduate Program, Tarumanagara University, (68 Pages, P1-P4, L1-L63).

This study examined the relationship between Achievement motivation and Learning achievement of English. Achievement Motivation is a drive directing someone to generate, manage, maintain, and release the output behavior toward a certain goal. Learning achievement is the result of learning by following and doing the exercise at school. The participants (N = 230) in this study were the students of SMAN 1 Tangerang with International School Program and were chosen using non probability sampling with convenience method. The result showed that there was no significant relationship $f(230) = 0.013$, $p > 0,05$ between achievement motivation and learning achievement of English of students of SMAN 1 Tangerang.
