

ABSTRACT

LINDA

The factors of Adolescent Resilience, who has submit an Abortion because of Premarital Pregnancy (Sandi Kartasasmita, M.Psi.); Bachelor Degree, in Psychology University of Tarumanagara. (104, P1-P4, L1-L12)

The huge numbers of premarital sex behavior in adolescent can gives negative effects, such as unwanted pregnancy and adolescent often take abortion as the solution. Abortion is a traumatic experience for every woman who does it and cause many negative effects for her physic and psychology. Each individual who had been through this traumatic supposed to be raised and built their life again, this ability called resilience. The purpose of this research is by knowing how the picture of adolescent resilience who had been done abortion because of premarital pregnancy. Research method which is being used in this thesis is qualitative research methods. Writer interviewed three subject whit different level of resilience. Adolescent who had the highest level of resilience can solve the depressed situation and can escape from pressure which had been through. Finally, he/she has a power to change bad situation into better situation.

Key words: abortion, resilience.
