The Description Of Prejudice Source On The Early Adult Marriage With The Different Ethnicity; Dr. Fransisca Iriani R.D., M.Si.; Undergraduate Program In Psychology, Universitas Tarumanagara, (i-xi; 79 Pages; R1-R3; Appdx 1-32)

Social prejudice is one of causes of individual's tend to decide to prefer marrying the partner of the same ethnic than marrying the partner of the different ethnic. But in fact marriage of individual's with the different ethnic might be done. Prejudice in usually negative attitude toward the members of a particular group. Inter-ethnic conflict, the process of learning, illusiory correlation, and the cognitivity are the main causes of the prejudice emergence. Problems in inter cultural marriages can be resolved if each individual can tolerate. This study aims to provide an overview of prejudice sources in early adult marriages with different ethnic. Qualitative research methods are performed with engineering depth interviews (In- depth interview) to the initial of four adult subjects who had five years of marriages age. The results showed that four subjects had a plenty of prejudice sources. Sources prejudice of the most experienced research subjects is a direct conflict between groups and early learning. The existing prejudices can cause negative stereotypes. So that, the subjects away from certain ethnic.
