

## ABSTRACT

**The Influence of elements in microsystem of aggression in adolescent murderer (Reviewed from Bronfenbrenner Ecological Theory) (Study in Lembaga Permasyarakatan Anak Pria, Tangerang); Naomi Soetikno, M.Pd, Psi. undergraduate Program in Psychology, Tarumanagara University, (i-xii; 100 pages, R1-R3, Appdx 1-57)**

The problem of juvenile delinquency is the main problem faced by most of society, such as criminal acts, fight, free sex, drug abuse, and murder. Murder is a juvenile form of aggressiveness can be seen from the aim, norm, and form (Berkowitz, 1995). Things can affect the aggressiveness is surrounding environment, such as elements of family, peers, school, and neighborhood known as elements in microsystem (Bronfenbrenner, 1975). The aim of this research is to know the effect of the elements in microsystem of aggression in adolescent murderer, as well as to see the most element in microsystem affect aggression. The method of this research is a mixed method, involved 15 quantitative subjects and followed by three subjects interview. The results of this research by quantitative method showed no difference between effect of the elements in microsystem of aggression in adolescent murderer, but qualitative data found elements in microsystem influence on the aggression in adolescent murderer of three subjects.
