**Contribution of Gender role and Conformity to Aggression in Female Supporter of Soccer; Bonar Hutapea, M.Si. Undergraduate Program in Psychology, Tarumanagara University. (i-xiii, 66 pages, P1-P5, appendix L1-L75).**

Soccer is the most popular sport in the world and have a lot of supporter. Soccer supporter not only man but female are now starting to like football. This study examined wether gender roles and conformity affect the aggression. This research method is convenience sampling technique to football female supporter. There are three questionnaire, Buss-Perry Aggression Questioner, Bem Sex Role Inventory, and conformity scale. This study shows the contibution of gender roles and conformity to aggression. There are several reasons that proved that adolescent girl have a high conformity and gender roles of masculine add to the high aggression.
