

ABSTRACT

Willy Yohanes

The relationship between music preference flows Someone with Personality Types In Adults Beginning. (Dr. Monty P. Satiadarma, MS / AT, MCP / MFCC). Bachelor degree in psychology, University of Tarumanagara (81 Pages).

This research looked at the relationship between genre preference someone with personality types in early adulthood. Musical taste preference is someone who prefer and like a certain type of music than others (Scherer & Zentner, 2001). McCrae and Costa (1999) describes the personality superfaktor called the big five or OCEAN comprised of openness (Openness), accuracy (conscientiousness), Extraversion, agreement (Agreeableness), neurotic. Superfaktor neurotic (Neuroticism) and Extraversion is a personality trait of the most powerful and general. The study was conducted in 102 early adulthood. The results of the correlation test showed there was a significant association of music preferences with different personality types.

Keywords: music preference, OCEAN, early adulthood.
