Abstract

Being homosexual is still considered as a deviation in most societies. Homosexuality is a feeling of love or are interested in either or both erotic feelings toward individuals of the same sex. In Asian cultures, each parent in general expect their children to get married to have a child. In individuals who are homosexual, marry the demands of parents raised concerns. Anxiety is a state where people feel a sense of worry and unpleasant to the impending danger usually is emotional and can be felt. In a study conducted by the author during five months (starting from July-November 2012) showed that three subjects had anxiety realistic and one of the three subjects of moral anxiety. The third major source of anxiety on the subject is still not dare reveal their sexual orientation to their parents.

Keywords: Anxiety, homosexual orientation, Demands Married.
