The Role of Personality Traits in Women divorce towards Marital Satisfaction pre-divorces; Bonar Hutapea, M.si & Sandi Kartasasmita, M.Psi. Undergraduate Program in Psychology, Tarumangara University, (i-xii; 49 pages, P-1 – P-4, L1-L31)

The aim of this research is to know the role of big five personality traits toward marital satisfaction on divorce woman. This research involved 68 partisipant, using purposive samoling and comnvenience samoling technique. The criteria of partisipant are woman who already divorce which categorized no faulty divorce and fault divorce. In general, the couple who already marreid have a goal to achieve marital satisfaction in their marriage. There is several factors that influence marital satisfaction and one of them is personality issues. The result of this research showed openness and agrreableness has a role toward marital satisfaction. The most dominant dimention have a role toward marital satisfaction is agreeableness with $F = 5,392$ and $p = 0,023$. At the other hand, openness also have a role toward martital satisfaction with $F = 4,633$ and $p = 0,035$. These result indicate that there is a significant role between agreeablenes and openness toward marital satisfaction. Where as the other dimention such extraversion, conscientiousness and neuroticism does not bear significant role toward marital satisfaction.
