Shame and Guilt: Construction and Psychometric Analysis based on Javanese Cultural Values “*Isin* and *Isin-isinke*”; Yohanes Budiarto, S.Pd., M.Si; Undergraduate Program in Psychology, Tarumanagara University, (xi; 62 page; R1-R7; Appdx 1-15)

The aim of this research was to develop a scale of shame and guilt in Javanese culture. This research was divided into three step: (a) exploration of shame and guilt based on indigenous psychology approach; (b) develop of shame and guilt into scale of shame and guilt; (c) psychometric analysis (Exploratory Factor Analysis (EFA) & Confirmatory Factor Analysis (CFA)). Participants involved in this research were students of Junior high school in Central Java (N=338). Shame and guilt consists of nine items clustered into two factors (*isin* and *isin-isinke*). Factor *isin* describe the situation that show shame and guilt felt by the people who thinking about the failure. Factor *isin-isinke* describe the situation that show shame and guilt felt by the people who have the failure, because he/she thinking of the impact to others people around he/she. Data were analyzed using FACTOR Program 8.10. Reliability test show *isin* had a weak reliability <0.6, and factor *isin-isinke* had a pretty good reliability >0.6.

Keywords: Shame and guilt, Indigenous Psychology, Exploratory Factor Analysis (EFA), Confirmatory Factor Analysis (CFA), *Isin*, *Isin-isinke*, and Reliability.
