**The Role of Friendship Quality towards Adolescents Happiness; Sesillia Monika, M.Psi., Psi. Undergraduate Program in Psychology, Tarumanagara University, (i-x; 48 pages, P1-P5, L1-L50)**

In the perspective of engagement that happiness is obtained when doing social activities. Teenagers spend more time with their friends than families. This study has the aim of knowing the role of quality of friendship on happiness in adolescents. This shows that adolescents do more social activities with their friends compared to families. The subjects in this study consisted of 402 participants aged 11 to 19 years and residing in Jakarta. This research is a quantitative research with the process of taking data on quality of friendship and happiness with questionnaires measuring Friendship Quality Scale (FSQ) and Oxford Happiness Questionnaire (OHQ). The results of the data analysis of the research conducted were that the quality of friendship had a significant positive role on juvenile happiness by 7.9% while the rest (92.1%) is influenced by other factors.

Keywords: friendship quality, happiness, adolescence
