**The Relation Between Hardiness and Achievement Motivation Among Working Students; Dr. Heni Mularsih, M.Psi.; Undergraduate Psychology Study Program, Universitas Tarumanagara, (i-xii; 55 Pages, R1-R7; Appendix1-33).**

This study aimed to examine the relation between hardiness and achievement motivation among working students. The research participants was 166 working college students and the research was a quantitative research. The present study used purposive sampling technique by distributing questionnaires to participants physically and online. The research result showed that there was significant positive relation between hardiness and achievement. It showed that the higher the hardiness of a working student, the higher their achievement motivation. Conversely, the lower hardiness of a working student, the lower their achievement motivation.

Keywords: Hardiness, Achievement motivation, Working student.
