(E) *Abstract : The main aim of this study is to explore and determine the factors that affect the profitability of conventional banks in Indonesia by a variety of literature and previous research. The factors affecting capital structure is examined by testing 29 conventional bank that listed on Bursa Efek Indonesia (BEI), with 116 observations from 2012 to 2015. The samples taken using a purposive sampling method. Multiple linear regression model by panel data used in this study as a method of analysis. The results suggest that NPL and LDR have a positive and significant influence on ROA, while BI rate has a negative and significant influence on ROA. Meanwhile, CAR, BOPO, and inflation rate do not significantly influence ROA.*
