## **ABSTRACT**

*The Catholic Church is a place of worship for believers who believe in the presence of God in their lives. Many people today experience stress and depression because of a problem. This happened because of the lack of the role of the Church to give a sense of comfort and peace to the mood of the people. Interior Design of the Catholic Church influences the mood of the people. To be able to provide a sense of comfort and peace, it is necessary to design a Church that can provide that atmosphere to its people. It takes a theme, style, flow of circulation, and the need for comfortable activities for the people of the Church. Interior design is done by the existence of place surveys, interviews, literature collection, documentation, design concepts and work drawings. The comfortable interior design of the church will affect the mood of the people who are having problems because the peaceful atmosphere of the Church will give a sense that there is a presence of God in the midst of the people.*
