

PENERAPAN TEORI KEPEMIMPINAN MENURUT THEODORE ROOSEVELT DI PROYEK PEMBANGUNAN HOTEL DI BALI

Oleh : Indra Hartono

The dynamic development of information because of the globalization and liberalization of the world economy affects the joints of Indonesian society. Entering a new era where the power demand reform leader and all elements of society for change and renewal in the life of the nation. In a smaller scope, would reflect how the general impact on a person's leadership in realizing the success of the project or organization.

Leadership is the ability and behaviors that inspire and motivate others to jointly achieve the desired goal. Leaders of character, integrity and has the power would make people become good citizens.

The research method was qualitative research. The scientific object is the opinion leaders of ongoing projects, national and world leadership theory, researchers themselves who have more than 20 years experience in civil engineering projects.

There are 83 indicators of leadership under the leadership of Roosevelt and 24 indicators according to the literature study conducted studies into 31 indicators of Indonesia's leadership. Researchers conducted a study on 31 indicators that get 19 indicators of construction Indonesian leadership.

The results of discussions researcher and expert opinions on 19 indicators of construction leadership Indonesia obtained 10 indicators of major construction Indonesian leadership. Leadership theory according to Roosevelt was very good and suitable to be applied to projects in Indonesia and would be much better if the added social, cultural and culture of Indonesian society.
