### Comments or Suggestions (Your comments are important for author please give suggestions as more as possible, thanks!)

This paper's idea is fascinating.

Comments on what needs to be done:

1. Please correct the grammar. There are quite a lot of grammar mistakes. For example, on the Abstract part: 'Establishment of Integrated Marine': please correct article usage.
2. Background problem is not apparent
3. New founding or novelty weren't seen yet compared to the 'related work.'
4. Paper organizations and the writing need to be more structured.
5. lots of information left off

Example on section 3: 'Implementation Detail'

In Figure 1. The Ocean Surveillance System's architecture hasn't been described in detail and effectively in the figure.

6. Architecture of algorithm deep learning and experiment need to be added; table 1 is not enough.
