Descriptive Study Adolescent Sexual Behavior premarital Judging from the shape of the Parent care in Jakarta; Widya Risnawaty, M. Psi.

Undergraduate Program in Psychology, Tarumanagara University, (i-xi; 60 pages, R1-R3, Appdx 1-34)

The aim of this research is to describe premarital sexual behavior in adolescents in terms of parenting style. This study involved 182 adolescents in Jakarta with a non-probability sampling technique. The results of the data analysis in this study are that the form of un-involved parenting style and authoritarian parenting style have a tendency to do sexual behaviors that tend to extremes stage, whereas parenting tend to form sexual behavior tends to be low is the form of authoritative parenting style and permissive parenting style. From the results of the crosstabulation between parent's parenting style and sexual behavior, the form of un-involved parenting style has a high percentage of each of the stages of sexual behavior, such as touching, kissing, petting, and intercourse. Authoritative parenting style has a low percentage of each of the stage sexual behaviour, such as touching, kissing and petting.
