

## ABSTRACT

**DWI ASIH ASTUTI**

**The difference of achievement motivation from SMP student at school with accreditation A, B, and C. (Niken Widiastuti, M.Si, Psi. and Dra. Ninawati, MM); Bachelor program in Psychology University of Tarumanagara. (48+P1-P5, L1-L33)**

The aim of this study is to see the difference of achievement motivation from SMP student at schools with accreditation A, B, and C. Subjects (N = 207) were chosen using probability sampling with cluster technique. In this study, the researcher chose 3 schools at East Jakarta that represented the highest score in each accreditation. Data was collected from a questioner which is taken from Department of Research and Measure of Psychology Faculty Tarumanagara University and analyzed with Oneway Anova through SPSS 13.0. The result show that  $F(2.204) = 35.471$ ,  $p < 0.05$ , which is shown that there is a significant difference in achievement motivation between students whose studied at school with accreditation A, B, and C.

Key words: achievement motivation and accreditation schools.
